Office Action Summary

Application No.

10/083,684

Applicant(s)

YAMAMOTO, TOMONARI

Examiner

Fazli Erdem

Art Unit

2826

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 February 2006.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-4, 6-10, 12-14, 16-19, 21-23 and 25-32 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1-4, 6-10, 12-14, 16-19, 21-23, 25 and 26 is/are allowed.
- 6) ☒ Claim(s) 27-32 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 2/3/2006 have been fully considered but they are not persuasive. Both the Esch and Talwar disclose capacitance values that are *more/larger* than 0.25 femtofarads.

Allowable Subject Matter

1. Claims 1-4, 6-10, 12-14, 16-19, 21-23 25 and 26 allowed.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 27, 28 and 31 rejected under 35 U.S.C. 103(a) as being unpatentable over Talwar et al. (6,380,04) in view of Guegan (5,705,410) further in view of Esch (4,056,825)

Regarding Claims 27, 28 and 31, Talwar et al. disclose a high speed semiconductor transistor and selective absorption process forming same where in Fig. 1E, shallow source extension 60, shallow drain extension 62, deep source extension 80, deep drain extension 84 are formed under gate structure 36 and in single crystal 10.

Source/drain extensions include dopants/impurities for amorphization. Talwar et al. fail to disclose the seeping of source/drain extension under the gate structure with the required capacitance value and the required gate/source overlapping capacitance.

However, Guegan disclose method of producing a semiconductor with a highly doped zone situated between lightly doped zones for the manufacture of transistors where in Fig. 2, source/drain extensions are under the gate and the required capacitance value is disclosed in column 7. Furthermore, Esch discloses a FET device with reduced gate overlap capacitance of source/drain and method of manufacture where in column 5 and in Fig. 5A, the required gate/source overlap capacitance is disclosed.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required seeping of source/drain under the gate with the required capacitance value and the required gate/source overlapping capacitance in Talwar et al. as taught by Guegan and Esch respectively, in order to have a semiconductor structure with increased performance.

4. Claims 29, 30 and 32 rejected under 35 U.S.C. 103(a) as being unpatentable over Talwar et al. (6,380,04) in view of Guegan (5,705,410) further in view of Zhang (6,855,954)

Regarding Claims 29, 30 and 32, Talwar et al. disclose a high speed semiconductor transistor and selective absorption process forming same where in Fig. 1E, shallow source extension 60, shallow drain extension 62, deep source extension 80, deep drain extension 84 are formed under gate structure 36 and in single crystal 10. Source/drain extensions include dopants/impurities for amorphization. Talwar et al. fail to disclose the seeping of source/drain extension under the gate structure with the required capacitance value and the required gate/source capacitance overlapping capacitance. However, Guegan disclose method of producing a semiconductor with a highly doped zone situated between lightly doped zones for the manufacture of transistors where in Fig. 2, source/drain extensions are under the gate and the

Art Unit: 2826

required capacitance value is disclosed in column 7. Furthermore, Zhang discloses a thin film transistor, fabrication method thereof and liquid crystal display having the thin film transistor where in Figs. 5 and 6 and in column 8, the required overlapping capacitance between gate and source is disclosed.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required seeping of source/drain under the gate with the required capacitance value, and the he required gate/source overlapping capacitance in Talwar et al. as taught by Guegan and Zhang, respectively in order to have a semiconductor structure with increased performance.

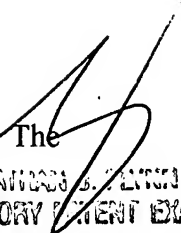

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
